European Robotics Week

ERW2017

The seventh year in a row, European Robotics Week turned out to be an amazing success. After the idea was conceived at the European Robotics Forum 2011, ERW was started in the same year because the European Robotics community aspired to bring robotics research and development closer to the European public.

Central Event in Brussels

Robots Discovery Exhibition at the European Committee of the Regions

Titled “Robots Discovery”, the central event hosted by **the European Committee of the Regions** (CoR) on 20-23 November, saw robotics experts from 30 European and regionally-funded projects outlining the impact of their work on society in areas such as healthcare, education, environment and international cooperation.

“The importance of robotics lies in its widespread impact and in its offer of new solutions to societal challenges: from ageing to health, smart transport, security, energy, environment, agriculture, and many more. This potential can be exploited at local and regional level by developing strategies to build smart specialisation in robotics and optimising the use of structural funds to complement the identified R&I topics. Cities and regions must act as innovation and test labs for the best research ideas, turning them into marketable products and services.” **(Markku Markkula, First Vice-President of the CoR)**

Central Event in Brussels

Robots Discovery Exhibition at the European Committee of the Regions

Logos Robots Orchestra

21 November : The event was officially opened by Markku Markkula, the First Vice-President of the CoR with a demonstration of an automated driverless electric minibus (part of the Interreg project [Sohjoa Baltic](#)). The day ended with a reception with a concert by the [Logos Robots Orchestra](#).

The Sohjoa Baltic robot bus

22-23 November : The Sohjoa Baltic robot bus met the public on the Esplanade of the European Parliament. The day ended with a high-level dinner hosted by MEP Martina Werner at the [European Parliament](#).

High-level dinner

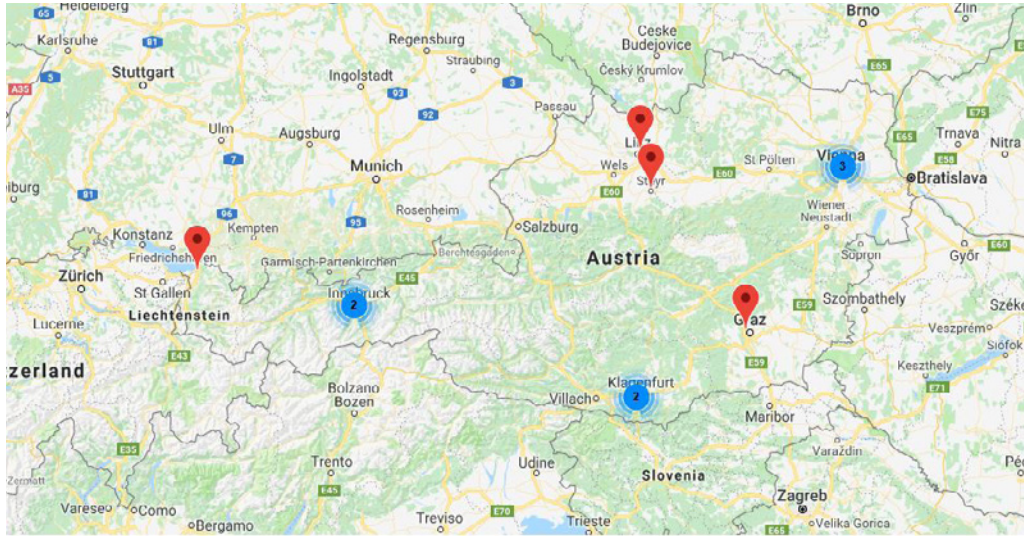

Euro Space Center

23 November : The workshop [How regions can benefit from robotics and how the EU can support innovation processes](#) took place under the patronage of the CoR.

24 November : [Baudouin Hubert \(Scientastic\)](#) held robotics classes for children at the [Euro Space Center](#).

Challenge / Competition , Educational Reach-Out , Exhibition , Media Event , Workshop / Public Talk / Discussion

Don't miss out on the biggest robotics festival in Europe, focusing on technologies like robotics, space tech and AI!

This year, Robotex will be bigger than ever: 24 robotics competitions, a conference, the biggest Technology exhibition we've had so far and over 40 workshops!

Robotex International 2017 takes place on November 24 - 26 at the Estonian Fairs Centre, Tallinn (Pirita tee 28).

Claim your free ticket for the expo or buy one for the conference + expo, now:
<https://goo.gl/5EyBh8>

And registration for competitors is also open: <https://goo.gl/tu2jXL>

In 2016, Robotex was already the biggest robotics competition in Europe, and this year we're only making it better and bigger. It's held in cooperation with Tallinn University of Technology and the University of Tartu. Bringing together the whole ecosystem...

This three-day family event hosts a variety of international robot competitions, showcases innovative new solutions in the Technology exhibition, and discusses important advancements in the field of automation at the Robotex conference.

Check out: <https://robotex.ee/en/>

Target audience

At the competition, we have four programs: 1. Beginner aka kindergarten-elementary school; 2. Intermediate aka basic- to high school; 3. Advanced aka University and older & 4. Entrepreneurial aka everyone with a real product.

The conference, expo and workshops are for everyone in all ages and from all countries.

In fact, we already have 2500+ participants for the competition and expect up to 3500 of them, including 1200 teams already at the moment. Also, we expect over 20000 people to visit the event, as last year we had already close to 16000 people visiting.

Robotics Fair
Be'er Sheva, Israel

Hide details

A full day robotics fair will take place at the Carasso Science Park in Beer-Sheva. The fair will include robotic demonstrations including a big robot building a tower, playing with robots, robotic Lego games, robotic competitions, and lectures by leading robotic scientists. The lectures will present robotic control systems, service robots, robots that adapt to the environment. The fair is organized in collaboration with the ABC robotics initiative, Ben-Gurion University of the Negev, the Ministry of Education, Robotech technologies, Young Engineers, FIRSt Lego League (FLL), FIRSt robotics Competitions (FRC), Beer-Sheva technology center.

MOLDOVA

16.11.2017 | 08:00 - 18:00

Celebration of educational robotics program expansion
Chisinau, Moldova, Republic Of

Hide details

USAID and Government of Sweden are supporting a new wave of educational robotics program expansion in Moldova. Thus, 37 new educational institutions are being added to the network and are receiving LEGO MINDSTORMS EV3 robot kits, and 40 institutions from the existing network, of 76 schools and 13 public libraries, receive additional equipment (LEGO WeDo robotics sets for primary school, Arduino based Makeblock robotics sets and 3D printers).

The educational robotics program in Moldova was started in 2014 with the support from international donors and under the patronage of the Ministry of Education. Until now the program reached 5000 direct beneficiaries – children and adolescents taking regular robotics classes in schools or extra-curricular centers. Robotics is an optional course taught in 70+ Moldovan schools by 100 active teachers. The expansion of the program will allow the impact to be amplified, including a broader range of age groups in the hands-on activities, as well as implement more innovative STEM learning scenarios, developing important 21 century skills for Moldovan Youth.

Target audience

School managers and teachers, Government representatives, international donors, media, general public
