# European Robotics Week

The eighth year in a row, European Robotics Week turned out to be an amazing success. After the idea was conceived at the European Robotics Forum 2011, ERW was started in the same year because the European Robotics community aspired to bring robotics research and development closer to the European public.

# Central Event 2018 in Augsburg

## “From the Romans to Robotics” Exhibition at Zeughaus

The **European Robotics Week (ERW2018)** achieved a major success with around 1200 interactive robotics related events across Europe, showing how robots will impact the way we work, live, and learn both now and in the future. From 16 to 18 November, Augsburg has been in the spotlight, hosting the Central event of the European Robotics Week 2018 with 1,500 visitors coming to the exhibition over the three days.

“With over 1000 events in more than 30 countries, we hope that the European Robotics Week will attract young people. It will be their opportunity to choose careers in this field. We need more young people active in these areas. Shortages in skills in engineering, or in data science, risk to block developments and need to be addressed”, (Lucilla Sioli, Director for “Artificial Intelligence and Digital Industry” at DG Connect, European Commission)

# Central Event 2018 in Augsburg

## “From the Romans to Robotics” Exhibition at Zeughaus

On Friday, 16 November, ERW2018 started with an Opening, gathering high-level representatives from industry, research, policy and politics, at the Augsburg Town Hall.

A group of 30 children and 10 teachers from Bosnia and Herzegovina, supported by euRobotics and the British Embassy in Sarajevo, visited Augsburg and the robots' exhibition.

From Friday 16 to Sunday 18 November, a robots exhibition, several public talks and activities for adults and children were offered at the Zeughaus.

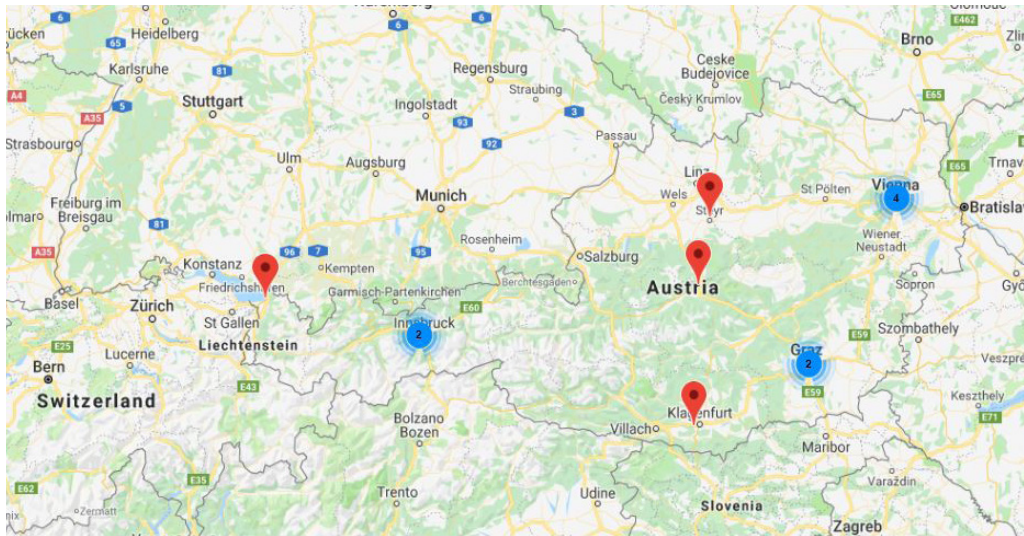

Vito di Bari, world's premiere futurist, innovation strategist and inspirational keynote speaker held a presentation “Robots, AI and the Future - Technology vs. Humanity”, held on 17 November, at Zeughaus.

Robotics Fair  
Beer Sheva, Israel

Hide details

A full day robotics fair will take place at the Carasso Science Park in Beer-Sheva. The fair will include robotic demonstrations including a big robots making different tasks , playing with robots, robotic Lego games, robotic competitions, and lectures by leading robotic scientists. The lectures will present robotic control systems, service robots, robots that adapt to the enviroment. The fair is organized in collaboration with the ABC robotics initiative, Ben-Gurion University of the Negev, the Ministry of Education, Robotech technologies, Young Engineers, FIRSt Lego League (FLL), FIRST robotics Competitions (FRC), Beer-Sheva technology center.

# LUXEMBOURG

19.11.2018 - 23.11.2018 | 17:00 - 18:00

Open house event of the Aerial Robotics Lab of the Automation and Robotics Research Group of the SnT - University of Luxembourg  
Luxembourg, Luxembourg

Hide details

Luxembourg is opening its doors to everyone interested in learning about the innovation and research we carry out in the field of aerial robotics. The attendees will have the opportunity to see our flying arena with a motion caption system, our multirotor aerial platforms (commonly known as drones), and the sensors, computers, and actuators we equip on our aerial robots. Finally, the most skilled and curious attendees will have the opportunity to manually pilot one of our multirotor aerial platforms.

#### Target audience

General public - The event is open to everyone who is curious about aerial robotics. Language: English (Luxemburgish, French, and German might be available but not guaranteed)

# MALTA

01.01.2018 - 22.04.2018 | 08:00 - 18:00

Malta Jnr Lego League

Ta Qali, Malta

Hide details

Malta Jnr LEGO® League is a STEM education program designed for young children (8 to 11 years). Teams made up of to 6 members will be guided by an adult mentor to explore and research a real-world problems related to the theme 'Our Environment'. They are challenged to design and develop a solution which includes a model using LEGO® Education WeDo.

#### Target audience

children, parents, educators and other stakeholders

#### Directorate for Digital Literacy & Transversal

¿Es la robótica beneficiosa para el ser humano?

Cancún Quintana Roo, Mexico

Hide details

El 22 de noviembre celebramos el día de la robótica en el colegio a través de diferentes actos: abriremos con un debate con el grupo de 1 de bachillerato con el tema "¿Es la robótica beneficiosa para el ser humano", después, los estudiantes de 2 harán unas presentaciones en formato pechakucha con diferentes temas relacionados con la robótica: ciencia ficción, medicina, música... Esos mismo grupos, a la vez, están creando una feria de robótica con su tema; construyen una mesa con capas de realidad aumentada y un póster que pintarán para el evento. Las dos mejores mesas, junto a la mejor presentación, ganará un premio. Además, se realizan dos concursos paralelos, uno de microrrelatos y uno de cortos con la robótica como tema central. El 22 se hará la lectura de los microrrelatos ganadores y se hará un pequeño festival con los cortos.

Target audience

Estudiantes de bachillerato
